

# Chapel Gallery Half Day Workshop

## A quality experience on your doorstep!

**Recollection:** 24 April - 5 June 2010  
**HALF DAY** Session.

Facilitated by a professional artist.

An exhibition that focuses on memory and mementoes, from nostalgia and the way in which memory distorts over time, to the emotions evoked by the simplest object, loaded with meaning.

Sara Nesteruk, The Accident (Animation Still)

### **The Workshop:** Treasured Moments

#### **Before attending the Workshop**

Think about the things you treasure, objects, photographs and memories of people and places. Perhaps you simply treasure something someone said to you that made you feel special. Do you have a keepsake from a holiday or a special visit? Did your best friend give you as a gift? What do you collect and keep and why?

#### **Working in the Exhibition Space**

A guided tour of the exhibition will be facilitated by the gallery officer, who will provide opportunities for the young people to engage in a discussion about the work. There will also be an opportunity to focus on specific works relating to the workshop activity.

#### **Practical Workshop**

Inspired by our obsession with capturing memories and using the idea of storing keepsakes you will create a 3 dimensional form embellished with fragments of text and drawings recording your memories.

NB: If you would like to base your work on a collective class experience you can bring a collection of photos and other mementos along to use in the workshop.
